

Rocket Riot revealed for Windows Phone 7!

Last week we traveled to Cologne (Germany) to visit the biggest game show in the world : [Gamescom](#). During this show Microsoft announced the first few games for their new Windows Phone 7 platform and our game [Rocket Riot](#) is going to be one of them! They even demonstrated the game on the show floor! Engadget had an [exclusive preview](#) of the games, and BestWP7Games showed the first [live footage](#) of Rocket Riot in action. A reporter at [Joystiq](#) liked the game so much he almost stole one of the Windows 7 phones.

Codeglue and Sparpweed to develop ibb & obb for PSN

Codeglue and [Sparpweed](#) team to develop Sparpweed's game [ibb&obb](#) for [Playstation Network](#). Ibb and obb is a cooperative game for two. Work together to find your way through the non-Newtonian world. Gravity isn't what it used to be. In the bottom half of the world gravity is reversed, enabling ibb and obb to walk on both sides of the horizon. Warps allow you to move from one half to the other. You'll have to find your way through the levels, surfing on gravity, soul hopping enemies and collecting diamonds. The game won an [IndieCade](#) innovation award and was showcased at the [E3 Expo](#) in 2008. Curious? Then check out the [latest trailer](#) of ibb&obb!

Codeglue develops games for Playstation Home

Recently Codeglue has developed several virtual games for [Playstation Home](#), SCEE's social gaming networking service. As an official development partner, Codeglue has developed [three mini-games](#) for Home Square, the central place where people enter when they start PlayStation Home. Codeglue has developed a Tug of War game, a Shooting Hoops game and a voting system in the form of a colored fountain. Since we are an official development partner we have also created [virtual goods](#) for brands like WATCHMEN™, Star Trek™, GI Joe™, Transformers™, Diesel™, Ligne Roset™, Karate Kid™ and Kick Ass™.
